Proceedings American Concrete Institute
VOLUME 81 1984

Individually authored papers, committee reports, and abstracts of separate ACI publications are indexed in three categories:

1. Title.....**Study on the effect of temperature variations on the bonding of concrete overlays, A** (81-19) M. P. Dhir Mar.-Apr. 1984 172
2. Author .....**Dhir, M. P.**—Study on the effect of temperature variations on the bonding of concrete overlays, A (81-19) Mar.-Apr. 1984..... 172
3. Subject.....**Overlays**—Bonded—Temperature variations and bond strength study (81-19) Mar.-Apr. 1984 172

Numbers in the parentheses with each entry constitute the title number of the paper or report. The first number is the number of the *Proceedings* volume in which the paper appeared; the second number is the number of the paper in the volume. For abstracts, which are not assigned a paper number, the identifying abbreviation AB is given; i.e., (81-AB). The month and year indicate the JOURNAL issue in which the material appeared. Page numbers indicate the first page of the item and are the same for JOURNAL and *Proceedings*.

Discussion is identified as "Disc." and is indexed under the paper title and the name of each contributor to the discussion. Only discussion which appears in *Proceedings* V. 81 is covered in this index. To find discussion of a paper, check the notice given in the JOURNAL issue in which the paper appeared. This notice will indicate where any discussion that developed is published. A similar notice is given with the abstracts of symposia publications. Discussion of symposia papers usually appears one year following publication of the abstract.
